

# TRANSFORMING EDUCATION FOR TODAY'S WORLD

**GLOBAL PEACE FOUNDATION** works with Ministries of Education and corporate partners like Intel, Cisco and Oracle to build public secondary school students' 21st-century workforce skills. Students experientially learn digital technology, explore entrepreneurial enterprises, grow teamwork and real-world problem-solving skills, and develop core values of leadership and integrity. Creating entrepreneurial hubs and empowered youth is a key part of the pilot programming in three countries.

**GLOBAL PEACE FOUNDATION** partners

with national Ministries of Education to train teachers in innovative approaches to education transformation in the classroom. We have long-term partnerships in place in the Philippines, Kenya, and Paraguay. Through ongoing advocacy and learning together, we are leveraging pilot programming to scale and driving change in educational systems on a national level.

Transforming education develops a workforce that drives employment and economic development, societal and political stability, and ethical societies free from corruption.

## KEY STAFF

**DR. TONY DEVINE**  
Vice President, Education

## ABOUT GLOBAL PEACE FOUNDATION

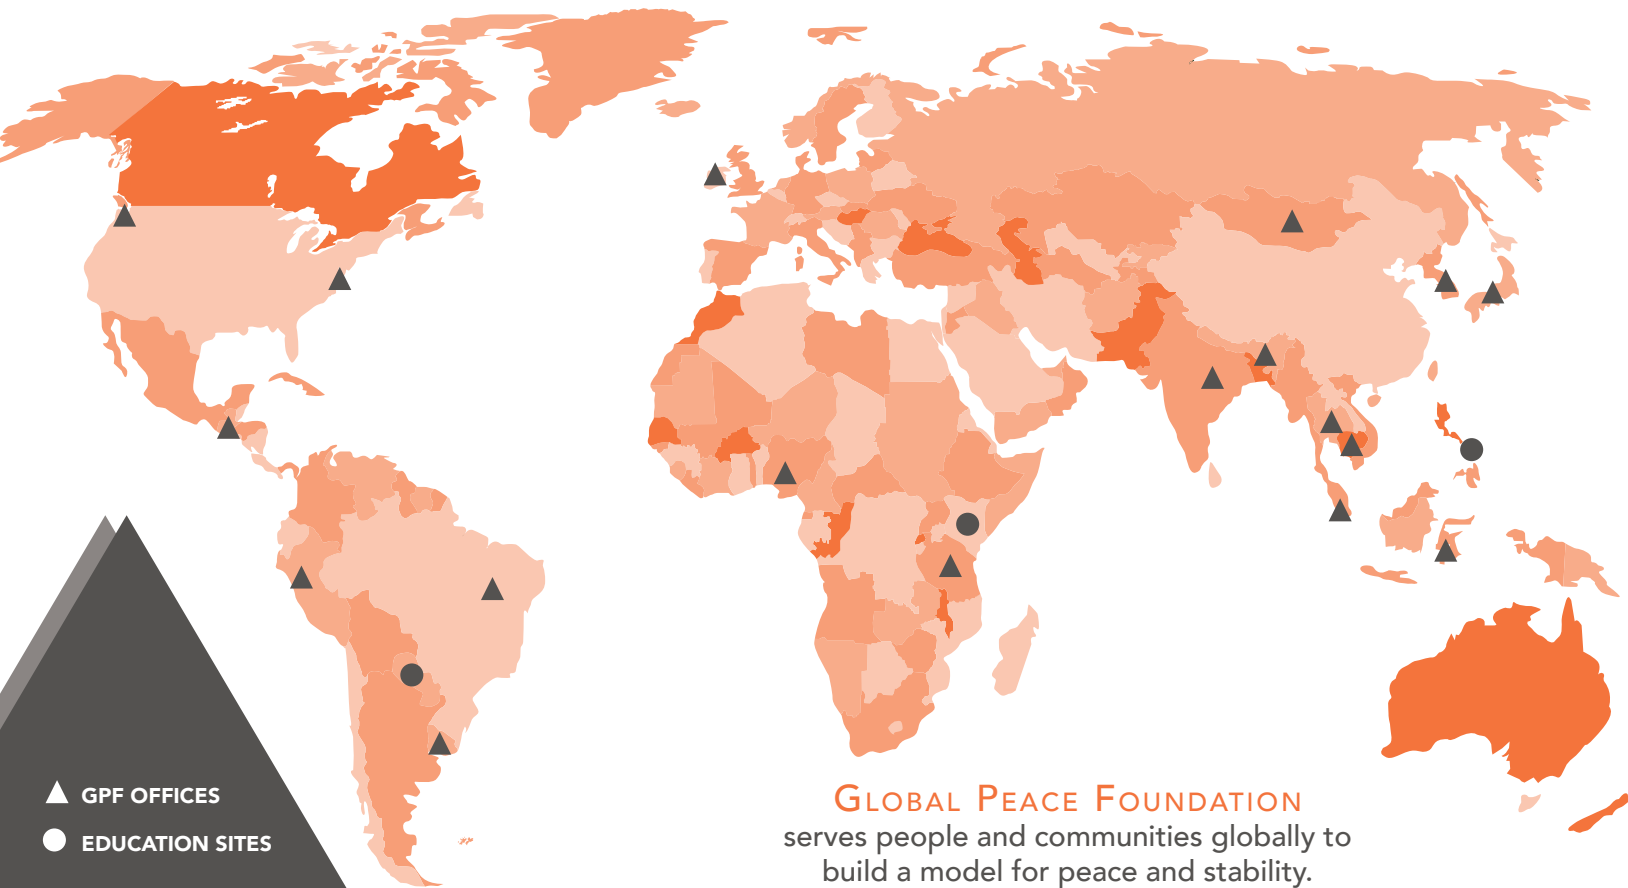

Founded in 2009, **GLOBAL PEACE FOUNDATION** is an international, non-profit organization that promotes an innovative values-based approach to peacebuilding. Our core program areas are peacebuilding, education and leadership development. We work with more than 20 field offices globally. GPF engages and organizes a global network of public and private sector partners who develop community, national and regional peacebuilding models as the foundation for ethical and cohesive societies.

# OUR GLOBAL IMPACT

**GLOBAL PEACE FOUNDATION** invests in globally-minded peacebuilders. Education and youth leadership development are key ingredients to building sustainable peace. Investing in education across our global portfolio creates a new generation of leaders that are innovative, entrepreneurial and give back to their communities. It's how we build peace—one school, one educator, and one child at a time.

# 120

SOCIAL ENTERPRISES, TECHNOLOGY AND BUSINESS DEVELOPMENT IDEAS IN INCUBATION

# 600

HIGHLY MOTIVATED YOUNG ENTREPRENEURS

## CHARACTER & CREATIVITY

Students globally are graduating with university degrees and failing to find employment. This youth unemployment bulge has a negative impact on economic development, peace, and security. **GLOBAL PEACE FOUNDATION** collaborates with Ministries of Education, local educators, global employers, change-makers, and students around the world to provide a meaningful and productive school experience that cultivates the whole person. We do this by offering a comprehensive framework of quality standards whereby students and staff cultivate competencies in integrity, compassion, ethical online and offline conduct, creativity, and problem-solving, teamwork and "hands-on" peacebuilding skills. Outside the United States, this area of focus is often viewed as an antidote to corruption.

## SMART WORKFORCE READINESS

Career opportunities favor graduates with global competencies and digital literacy, especially in the new frontiers of artificial intelligence, internet of things, big data and virtual reality. Apple CEO Tim Cook stated: "Learn to code, it's more important than English as a second language." Our programs empower students to use science and technology to solve real world problems. We partner with leading technology companies who provide hands-on trainings through the Cisco Academy, Andela's Teen Code, Oracle Academy, IBM's Teachers Try Science amongst others to equip teachers and students with technological skills, interdisciplinary learning and practical knowledge that prepare them for the 21st century workforce.

## ENTREPRENEURSHIP & SCIENCE INCUBATORS

Approximately 300 million youth worldwide are looking for work. Leap Hubs is a youth entrepreneurship, science and leadership initiative that strives to lower this number by empowering students to recognize unmet needs in their communities and transform them into opportunities.

Leap Hubs provides the guidance and space in public secondary schools for highly motivated students to explore ideas and learn what it takes to be a business or social entrepreneur or develop a science project. Separate from regular school curricula, small groups of exceptional youth build leadership, entrepreneurship and scientific competencies through a student-driven, education model.

## MAKING MEDICAL CARE MORE PERSONAL

### SCHOOL NAME:

Kariobangi North Girls' High School  
Nairobi, Kenya

### PROJECT NAME:

Medics App

### TEAM MEMBERS :

Rosalia Adhiambo, Anjeche Elizabeth,  
Margaret Awuor, Agnes Kalondu

Developed by 4 students, Medics App is a mobile application that allows doctors to manage patient appointments and reduce long waiting times. Patients can preview doctors and book appointments in advance. Medics App is built on the Intel XDK platform and will also be used by pet owners to book veterinary appointments.

## KEY PARTNERS

### Government

Bureau of Learning Delivery, Department of Education, Republic of the Philippines

Institutes of Curriculum Development in Kenya, Philippines and Paraguay

Ministries of Education in Kenya, Philippines and Paraguay

### Corporations

### International & Regional Bodies

## LOOKING FORWARD

Over the last seven years, GLOBAL PEACE FOUNDATION has successfully piloted education projects and cultivated relationships with Ministries of Education and various bureaus, multinational corporate employers, and built a strong base of educators.

Looking forward, GLOBAL PEACE FOUNDATION aims to scale the impact of this transformative work. Expanding to an additional 100 STEM-focused public schools in Kenya will demonstrate the potential for national impact and replication, and also illustrate a private-public sector model that works for youth. This means thousands more young men and women will be prepared for 21st century economic opportunities—by entering the workforce or creating jobs through entrepreneurship.

Long term, Global Peace Foundation aspires to proactively impact policy at the national level, with strong connections and evaluation measures related to economic development, education assessment, and positive social development related to peace and stability.
