

Transforming Education through Values, Innovation and Future Ready Skills

MORAL AND INNOVATIVE LEADERSHIP (SEGMENT OF THE MAIN PLENARY)

This segment of the Global Peace Convention 2021 Main Plenary will explore the convention theme of "Moral and Innovative Leadership" and its relevance in transforming education, youth as changemakers and women peacebuilders. The moral orientation of leadership focuses on promoting a "greater good" that can benefit not only the individual but the larger society, nation and eventually the world. The corresponding side of innovative leadership harnesses humankind's natural creative need to advance and develop the human condition and explore fresh and creative ideas to solve the many problems of our time. Examined will be the reinforcing ecosystem approach of the home, school, and community in advancing a consistent and reinforcing perspective that exemplifies moral and innovative leadership.

TRANSFORMING EDUCATION IN ASIA

Transforming Education for the Future

The global pandemic has underscored the need for readiness in online access, quality of education and well-being of students and teachers. The need for moral and innovative leadership has never been more pertinent as educators rethink ways to prepare their students for the world of automation, artificial intelligence, robotics, The Fourth Industrial Revolution (4IR), climate change, as well as social issues related to inequality and relating beyond differences. In this session, thought leaders will explore new trends, ideas, policies and innovations underway to prepare students to be successful in all aspects of their lives and have the agency to contribute to the creation of flourishing societies.

Realizing Future-Ready Education

Join us to hear from innovative educational thought leaders to share their perspectives on the essential competencies and changes needed in education to ensure that students have the capacity to positively impact their lives, work, communities, and world. Future ready skills are in high demand by employers, yet these need to be guided well by shared values in the application of new knowledge and technologies to solve the pressing problems of our time for the greater benefit of humanity. Correspondingly, teachers and school leaders will need to re-imagine their roles by having the future arc of their students at heart in creating engaging, innovative, personalized, and collaborative school cultures. In addition, schools can increase their effectiveness by becoming learning hubs in their communities.

TRANSFORMING EDUCATION: GLOBAL

Envisioning a Thriving 21st Century Civilization: Youth Making It Happen

Incredibly, students now in primary, secondary, and tertiary education will live into the twenty-second century. This session will explore the importance of values to practice and model by youth to guide skills and knowledge to ensure that our twenty-first century civilization is more prosperous and peaceful. Empowering "student voice" and "personal agency" in our families, schools, communities, and nations will result in a more honest, caring, fair and transformed world. The presenters will also address how schools can become laboratories where every young person develops the courage and "questioning mindset" to become an active and engaged citizen.
